Second-Generation Semi Active Öhlins Smart Electronic Control (S-EC)

Minimise cavitation, resulting in more stable damping control and improved bump absorption at high speeds.

Brembo Stylema Front Brake Calipers

The calipers maintain rigidity but are 7% lighter, with less internal fluid volume for more immediate reaction.

Launch Control for Fast Starts

It limits engine rpm at 6,000, 7,000, 8,000 and 9,000 rpm set-points, even a wide-open throttle. A quickshifter is also fitted as standard.

Switchable ABS Modes

For flexible ability (and along with Rear Lift Control) the ABS gains two switchable modes: SPORT / TRACK.

Titanium Muffler Developed Jointly with Akrapovic

It's made out of titanium for light weight, and the design also contributes to the bike's mass centralization.

Full-Color TFT Meter

Screen setting options with items like riding modes, speedometer and tachometer, shifter setting, ABS level and much more.
